

**Dear religious neighbors,**

*This is just a friendly reminder from your local atheist and humanist group:*

---

*It is perfectly acceptable and even virtuous to think critically about any faith based ideas which are silly, harmful and oppressive.*

*It is wise (and not disobedient) to refuse to be told what to think. Be your own person and care about what is actually true. Test it. Scrutinize it. Believe what turns out to be reality. Why believe anything else?*

---

Please take a reminder below. Think often. Be free.
